

Welcome to ETS-Lindgren

2016

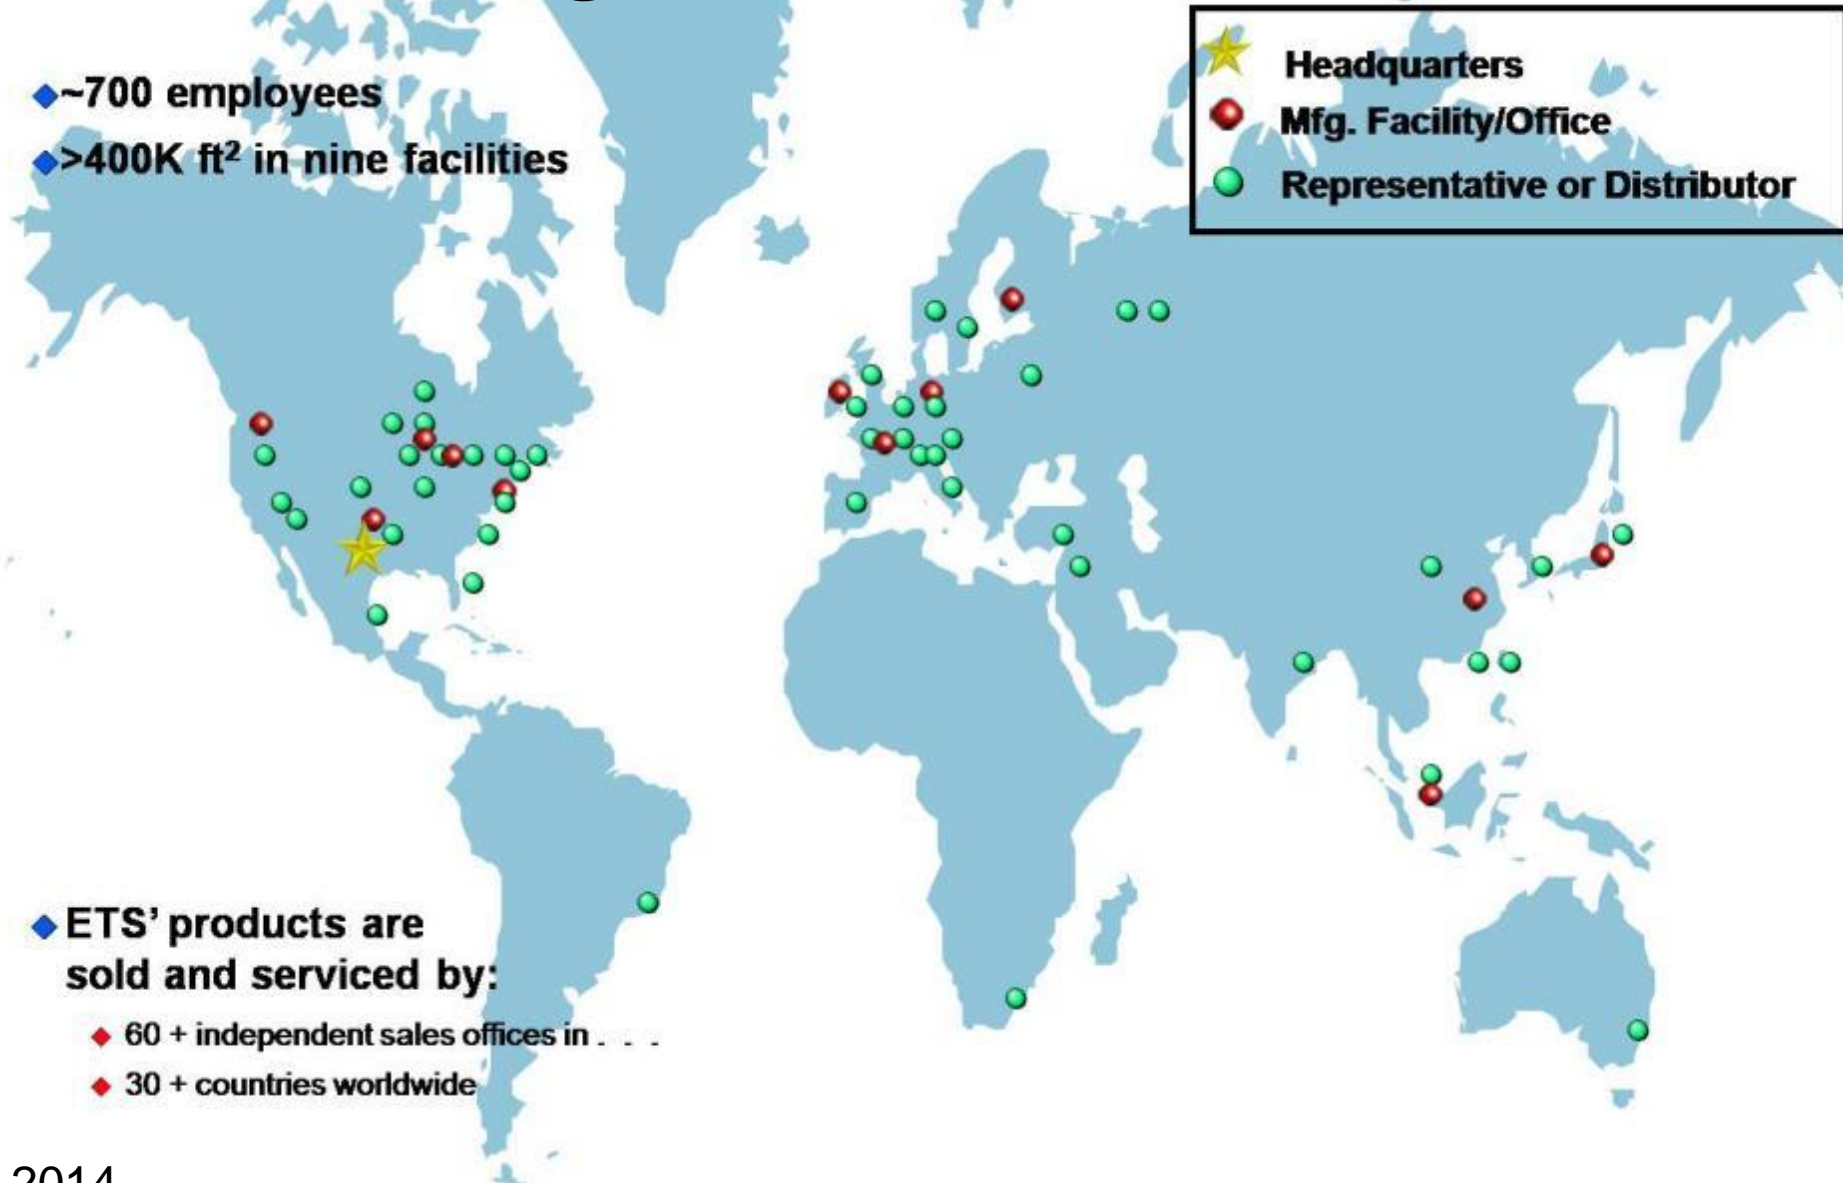

Welcome to ETS-Lindgren.....

**.....we are a specialty engineering,
design, and construction company which
builds complete Test Solutions required
to perform world class measurements
within carefully controlled electrical or
acoustic environments**

Parent Company: ESCO Technologies

- **ESCO Technologies is a global supplier of highly engineered products and systems in three distinct market segments:**
 - Utility Solutions
 - Filtration/Fluid Flow
 - Radio frequency (RF) Shielding and Test (Test).
- **\$600M in Turnover**
- **Publically traded on NYSE: ESE**

ETS-Lindgren Worldwide Locations

What We Do:

- **ETS-Lindgren provides our customers with the ability to:**
 - Identify,
 - Measure,
 - & Contain...
- **Magnetic, electromagnetic and acoustic energy**

What We Do:

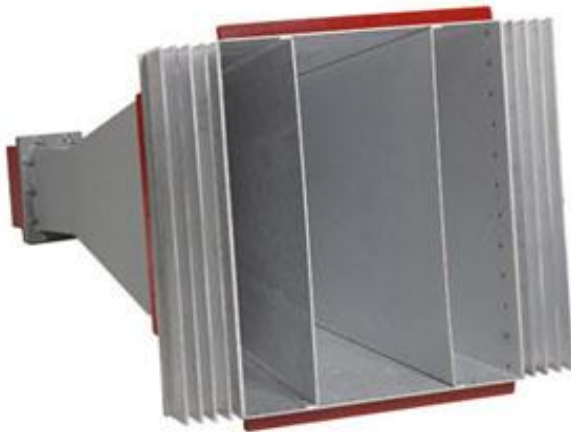

■ We do this so our customers can:

- Better **understand the radiated performance** of the devices they design and manufacture
- Comply with **regulatory standards**
- Work in an acoustically and/or electrically **quiet environment**
- Improve the quality of **sensitive measurements**
 - MR Measurements
 - Audiometric Measurements
- **Contain fields** to protect surrounding equipment
- Protect sensitive **cryptographic communications**

Who We Serve:

- **ETS-Lindgren serves Four Primary Markets**
 - Test and Measurement
 - Government/Industrial Shielding
 - Acoustics
- **We provide a broad range of services**
 - Design/Consulting
 - Construction/Integration
 - Testing/Calibration
- **We provide an extensive range of products**

Field Measurement Devices

Shielded Enclosures

Immunity Systems

Complete EMC Measurement Systems

MRI Suite Traditional and Interventional

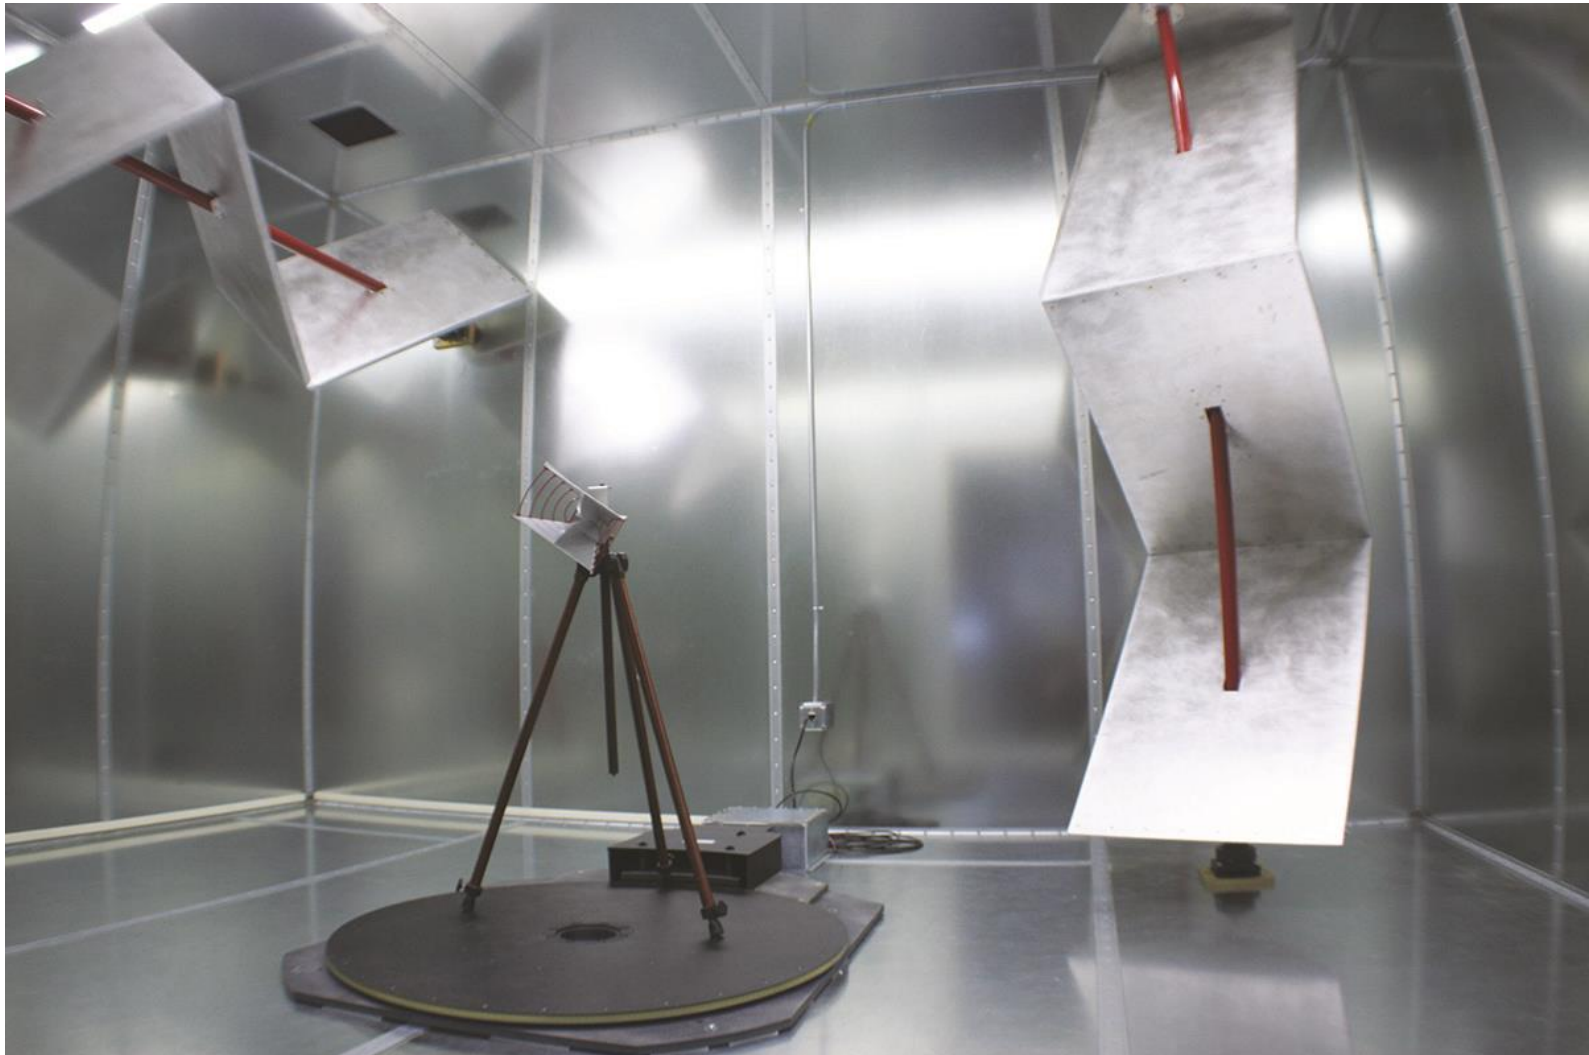

Broadcast and Recording Studios

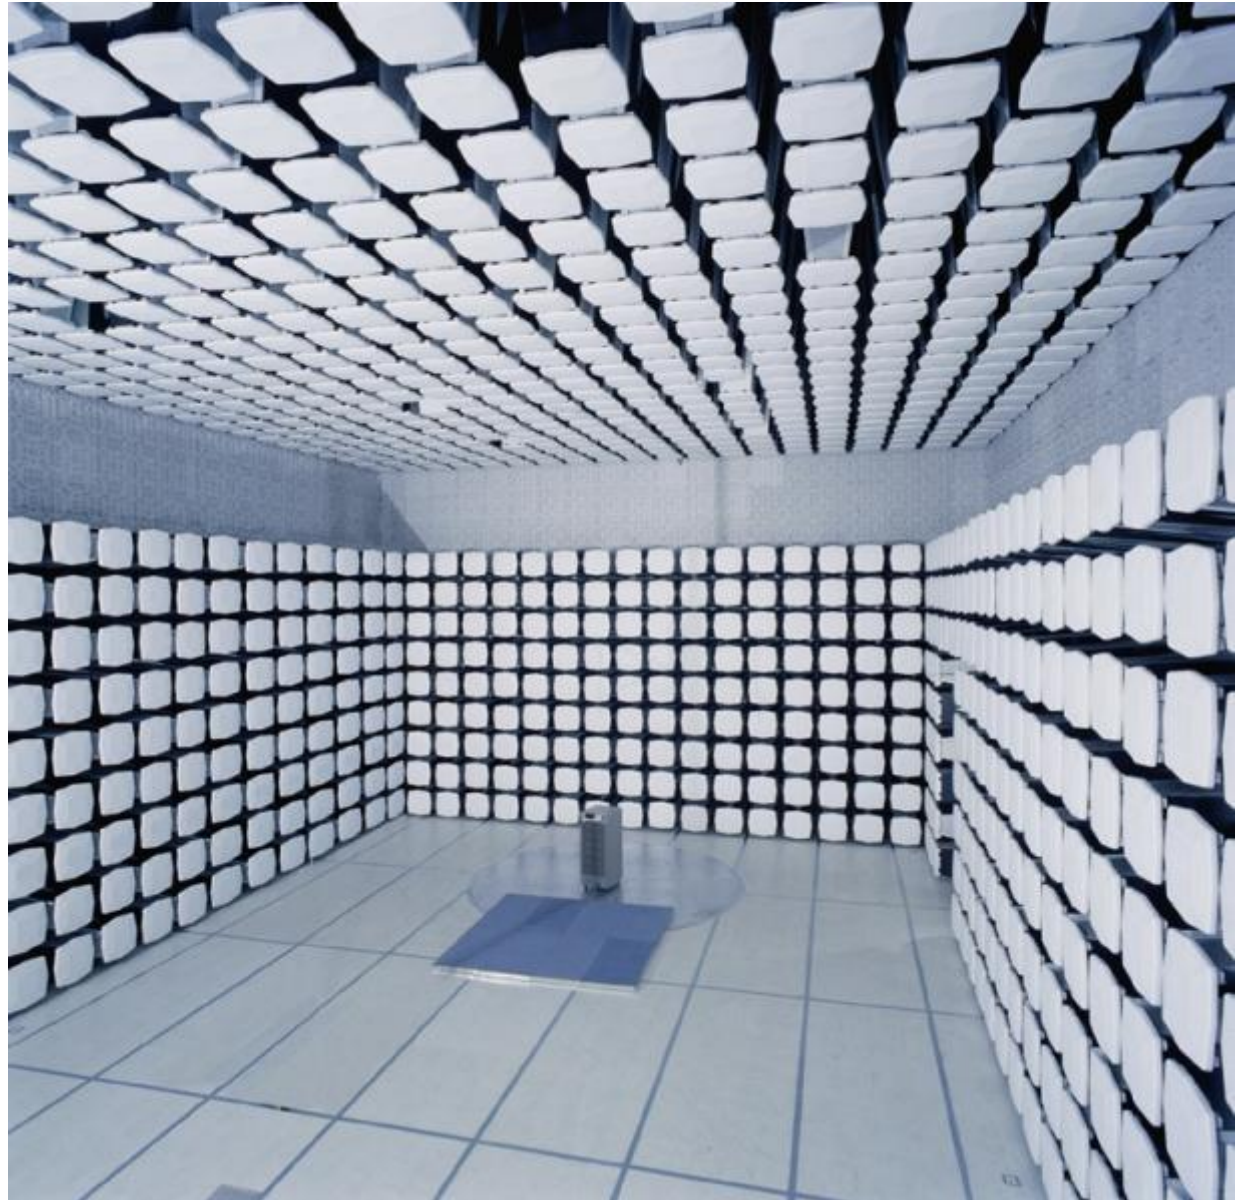

Acoustic Test Chambers

Reverb Chambers

10m EMC Full Compliance Chambers

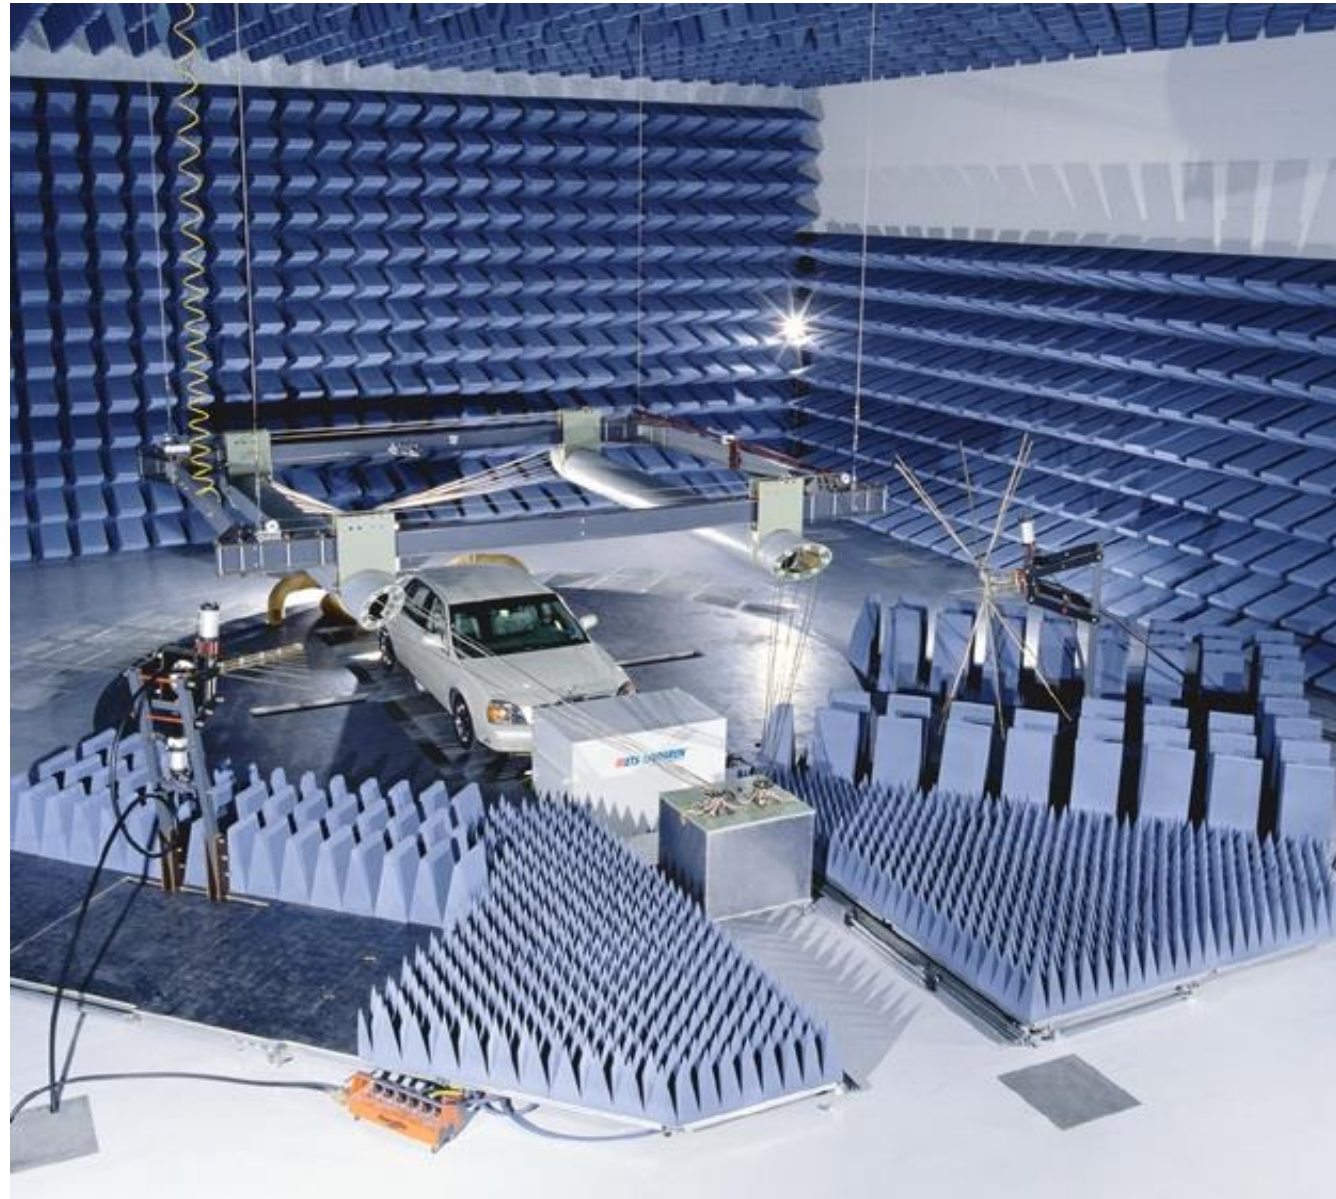

Compact Ranges

Aircraft Test Facility

Automotive Facilities - Americas

Full Vehicle Facilities - Europe

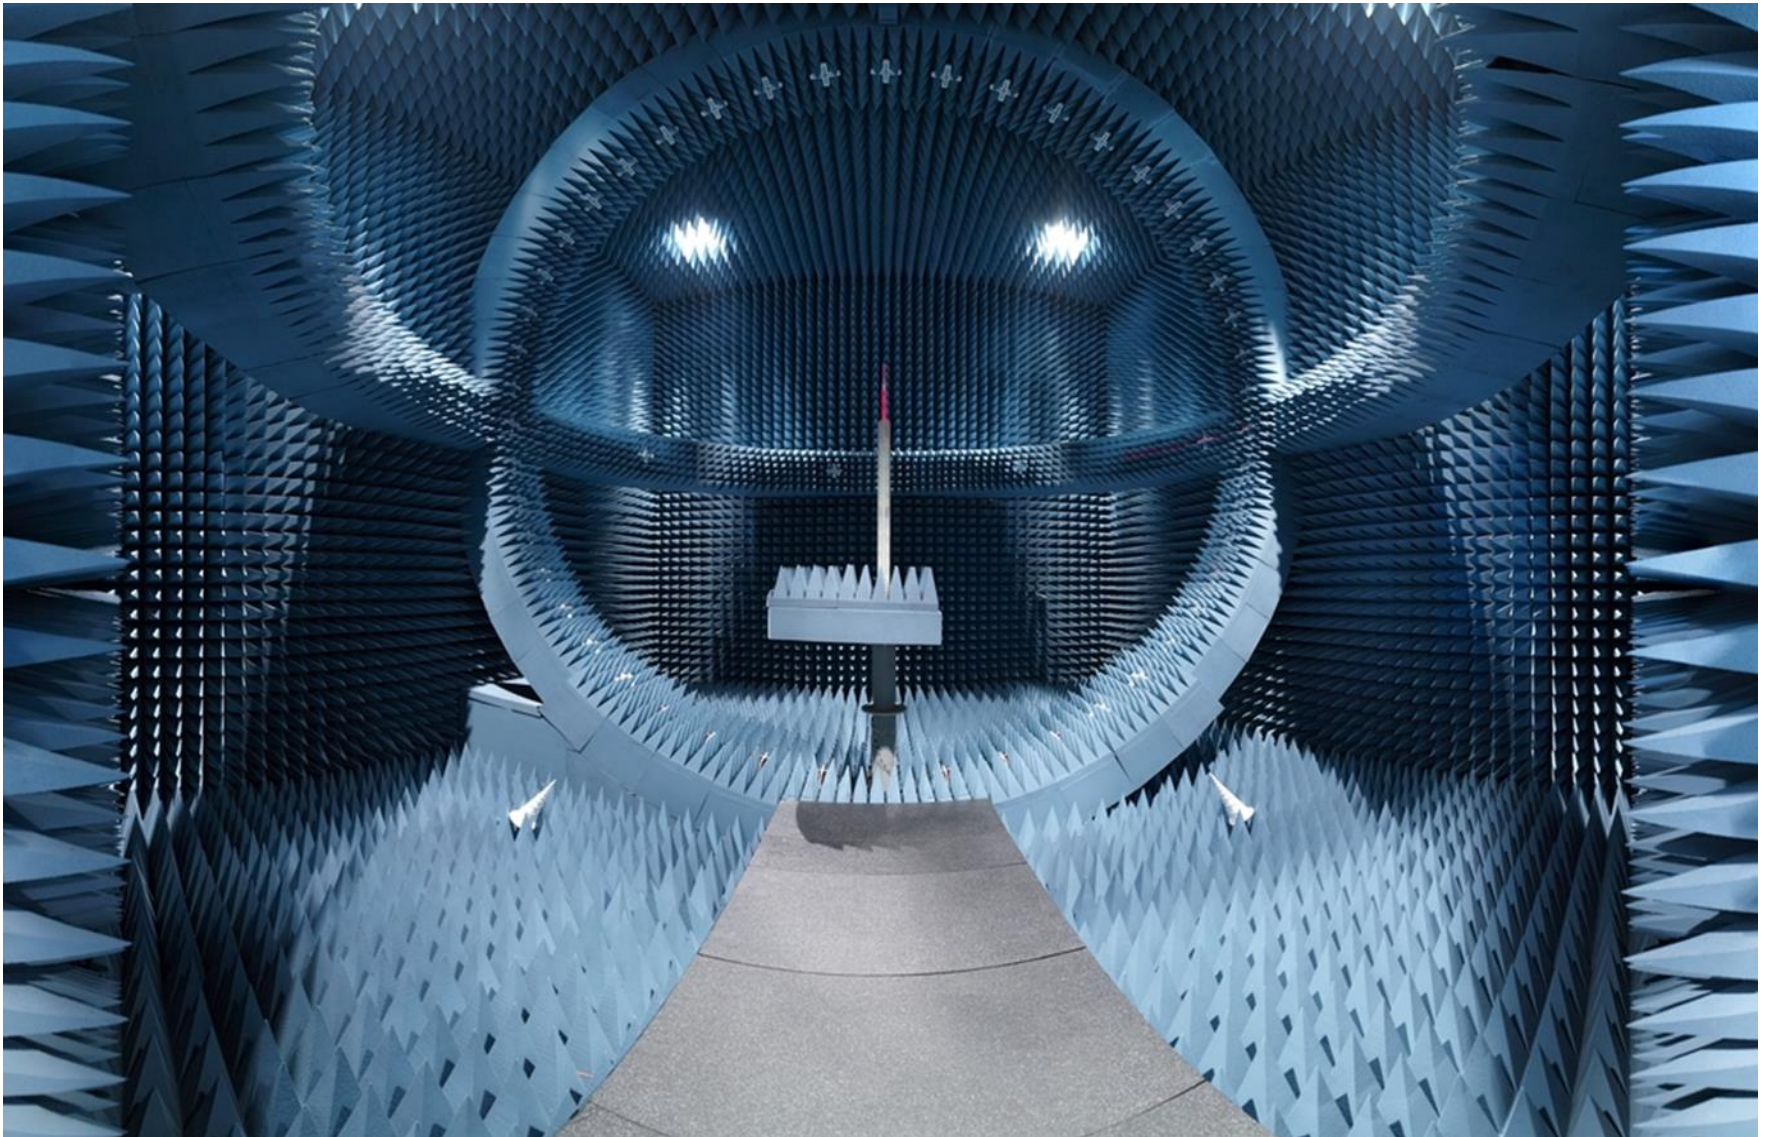

Automotive Facility - Europe

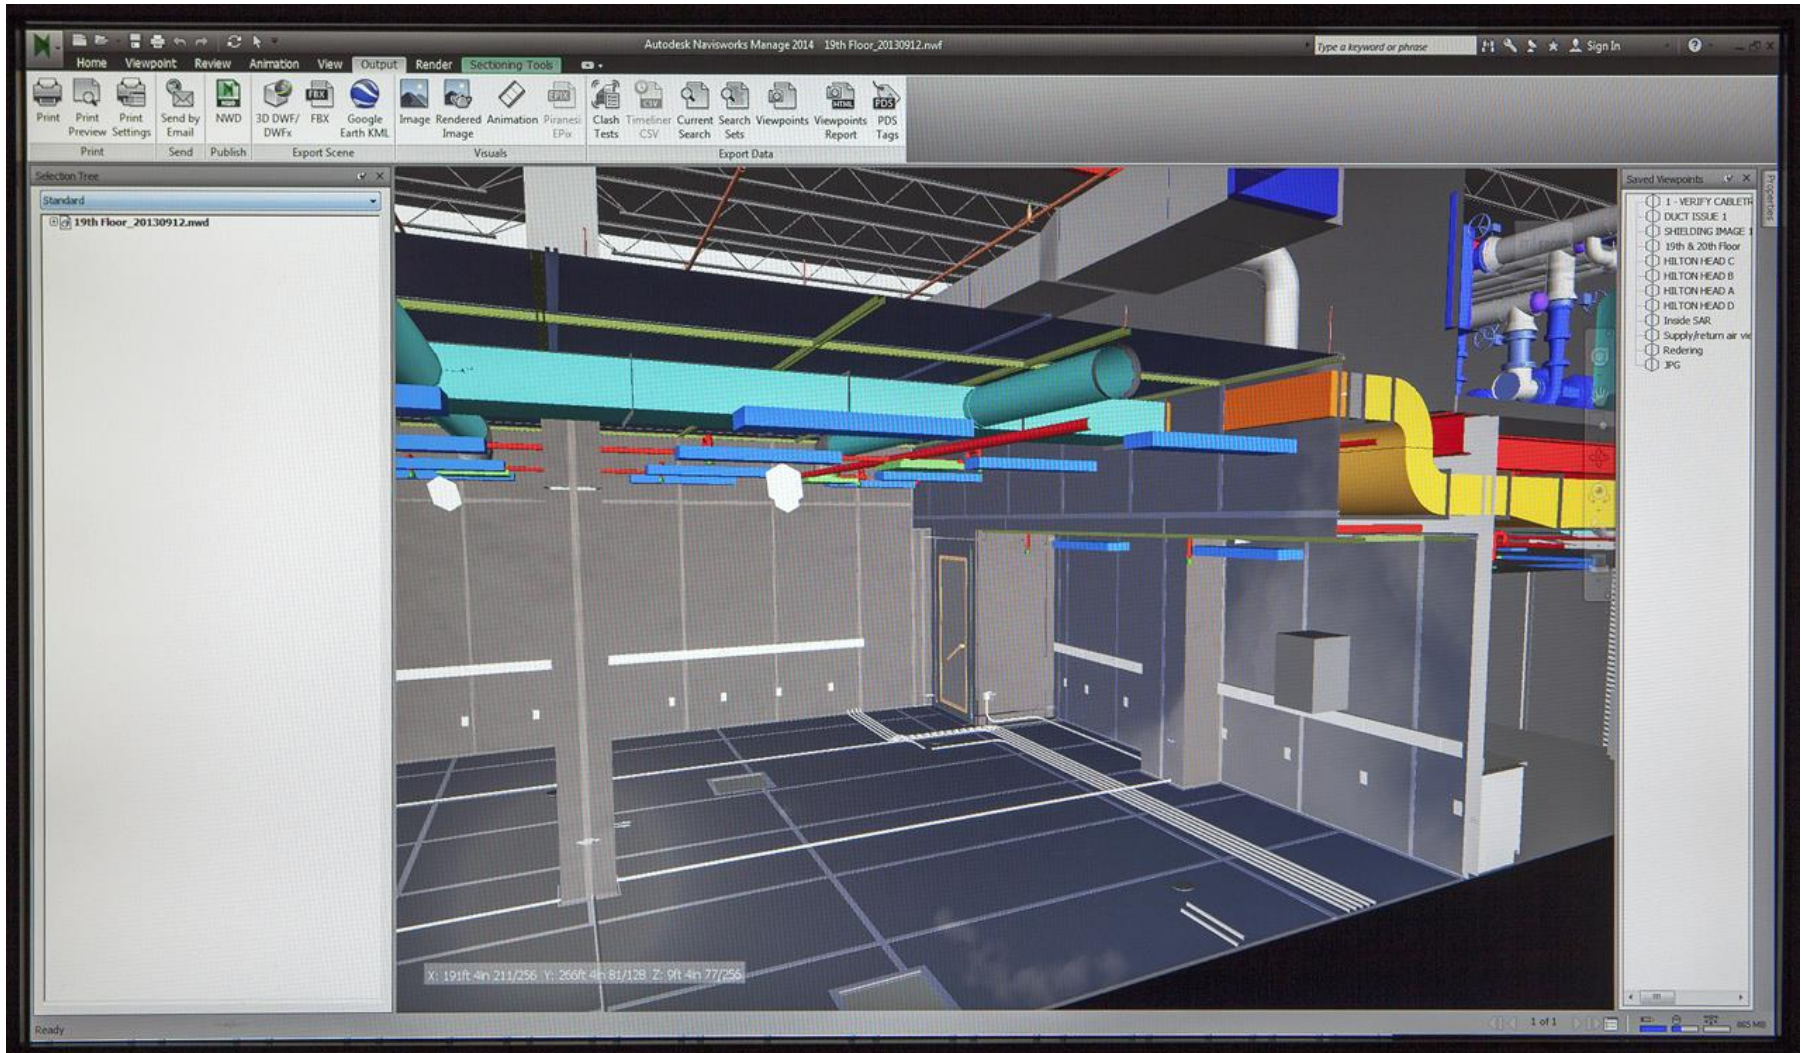

Automotive Facility - Asia

Wireless Antenna Measurement Systems

BIM (Building Information Modeling)

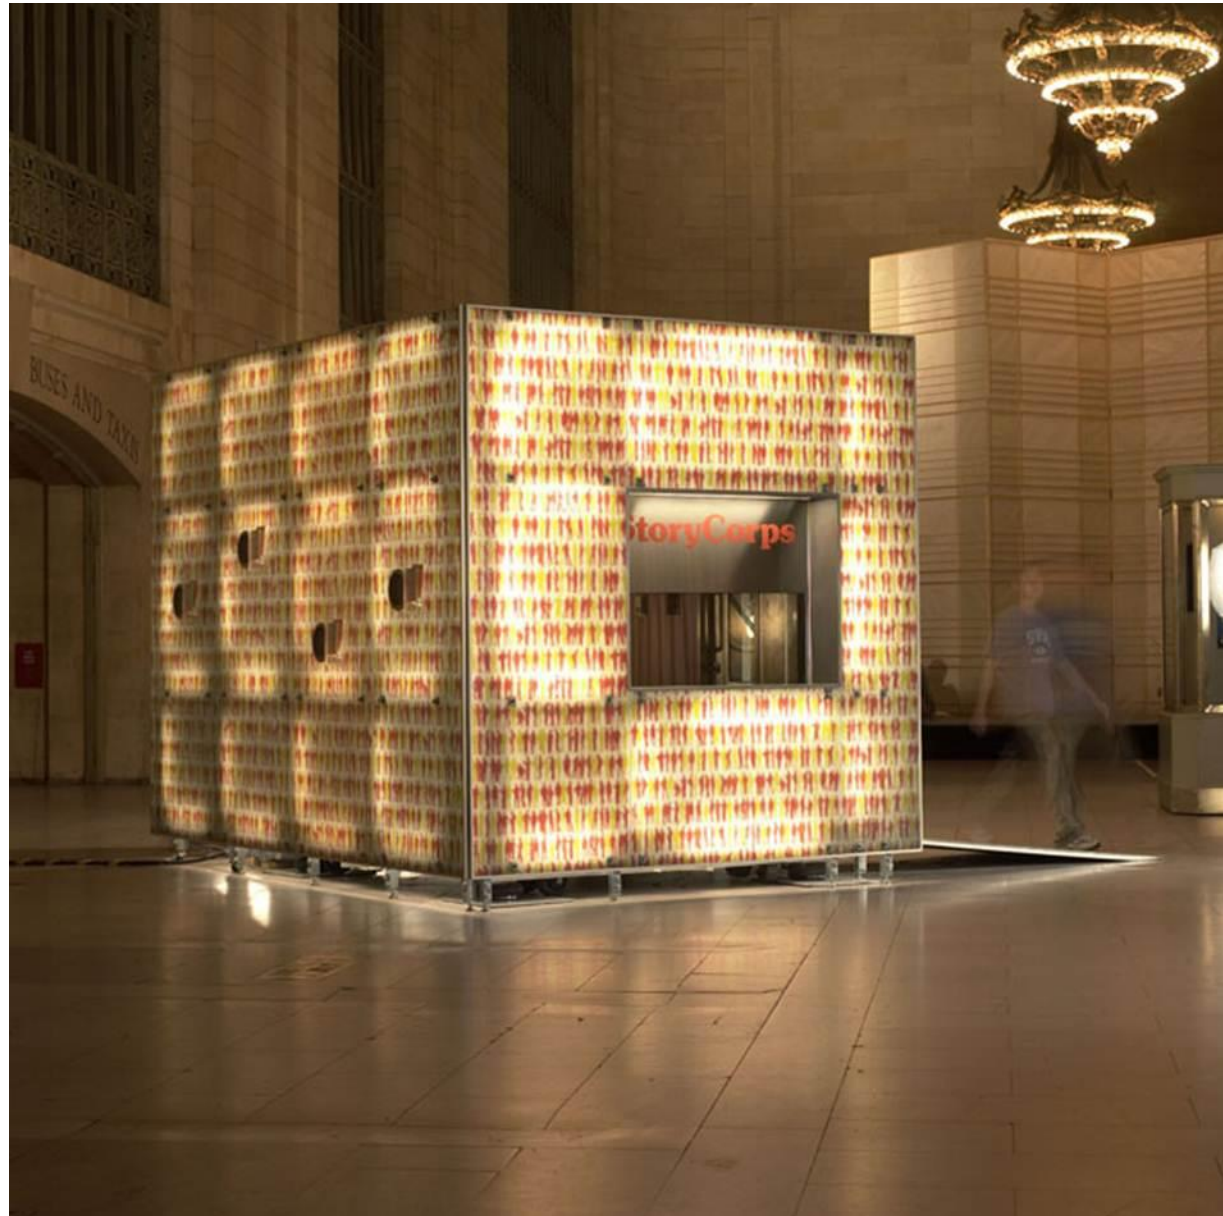

**Sometimes we even find
our products used in very
interesting ways....**

...like testing the
space shuttle...

**...a
recording
booth in
Grand
Central
Station...**

...or in a Neutrino Lab at the South Pole...

...in the movie “Armageddon”...

...or the Transformers Secret Base...

Summary

- ETS-Lindgren has a ***robust product offering*** which provides test engineers with the facilities, equipment, and services required to make high quality measurements
- ETS-Lindgren ***continues to innovate***, developing the measurement equipment, techniques and standards that will be required to measure in an increasingly complex radiated environment
- ETS-Lindgren is committed to the industries it serves and supporting the work done by research institutions and standards bodies

Welcome to ETS-Lindgren!

Make yourself at home!
